

**SELF  
DEFENSE  
FOR  
SKIN**

## Protect yourself with **Bio-Safe™ Skin Protectant**

**BIO-SAFE...YOUR BEST PROTECTION  
AGAINST THE DANGERS YOU CAN'T SEE...**

**LET BIO-SAFE SKIN PROTECTANT "WATCH YOUR BACK" WHILE YOU WORK, GUARDING YOU AGAINST INFECTION OR CROSS CONTAMINATION FROM:**

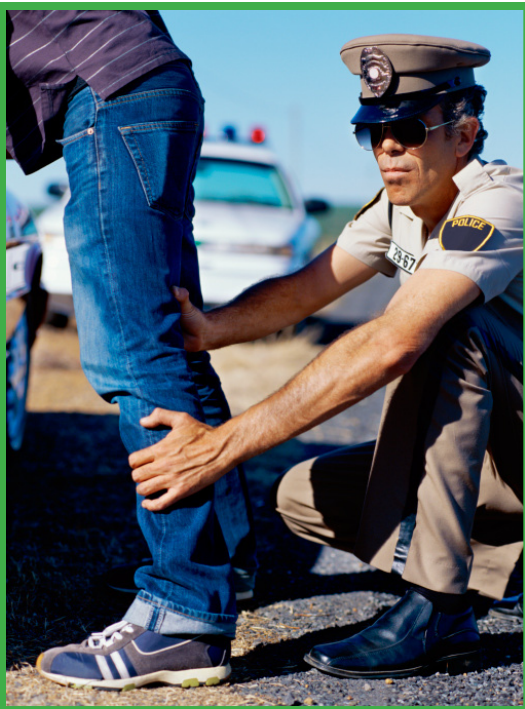

- Bodily fluids (saliva, urine, feces, blood and semen)
- Most corrosive agents & harsh chemicals (pepper spray) and other environmental hazards
- Latex sensitivity, acids, solvents and poison oak and poison ivy

**BIO-SAFE DOESN'T REPLACE PERSONAL PROTECTION EQUIPMENT (PPE).  
BIO-SAFE SKIN PROTECTANT IS**

- The back up plan you can trust if you are exposed to contamination before you have a chance to glove or get your face shield in place.
- The extra layer of insurance and protection against PPE breach.

**Add Bio-Safe Skin Protectant to your preparedness plan.** Protect yourself, your fellow officers and your family from harmful exposure or cross contamination.

**Bio-Safe Skin Protectant lotion** goes on fast and lasts up to 4 hours. If working with abrasive materials, re-apply every 2-3 hours. Won't wash or rub off, even with repeated hand washing. Over a period of hours, Bio-Safe's invisible protective coating sloughs off along with the normal shedding of the outer layer of dead skin cells.

### **SAFE TO USE**

**Bio-Safe Skin Protectant is manufactured and tested in FDA registered labs.** It is **hypoallergenic** and has tested to be orally non-toxic, non-irritating to eyes, non-sensitizing to skin and inert (no transfer of product). It is rated as having zero risk for flammability and reactivity. Ingredients are classified as GRASE (Generally Regarded as Safe and Effective).

### **WILL IT PROTECT AGAINST HIV?**

According to ViroMed Laboratory, tests under controlled conditions in the lab show Bio-Safe as effective in inactivating the HIV virus. However, this product has not been tested against HIV in humans.

**The only risk with BIO-SAFE SKIN PROTECTANT is not using it every day.**

**Protects. Heals. Nourishes.**

## WHILE YOU WORK, BIO-SAFE IS ON THE JOB.

**Bio-Safe Skin Protectant's** patented polymer coating **nourishes and protects** your skin while the antibacterial action helps inhibit the growth of germs for up to 4 hours. The lotion forms an invisible electrochemical bond to the outer epithelial layer of the skin, establishing a

- **“Shield” proven effective against viruses and bacteria** such as Staph, Strep, E.Coli, Salmonella and two “superbugs,” MRSA and VRE.
- **Protective barrier** that won't wash or rub off for up to 4 hours.
- **Secondary layer of protection** for cuts or scrapes on gloved hands, especially if gloves or other PPE are compromised.
- **Hypo-allergenic and non-toxic environment that blocks irritants** from your skin.
- **Protective “net” that prevents chapping, cracking and dryness-** (even under gloves and other PPE) and allows the skin to breathe and perspire while retaining its own natural moisture. Bio-Safe is enriched with Vitamin E and Glycerin.
- **Polymer barrier that helps prevent cross contamination and skin absorption** of most harsh chemicals, latex protein and resin, biological fluids, water, and toxic and odorous compounds.

### Dispensing options for Bio-Safe Skin Protectant include:

Locking stainless steel dispensers deliver a pre-measured amount and contains over 1000 applications. Also available in a variety of sizes ranging from handy flip top 1,2,4 and 8 oz. sizes for pockets, desk, or vehicle, or larger sizes with pumps.

BIO-SAFE SKIN PROTECTANT APPLIES IN MINUTES TO CLEAN, DRY SKIN AND LASTS UP TO 4 HOURS. IF WORKING WITH ABRASIVE MATERIALS, RE-APPLY EVERY 2-3 HOURS. SEE GENERAL BROCHURE FOR DETAILED INSTRUCTIONS.

*“Thanks to B-S SP, the chance of a corrections official acquiring bacterial & viral infections as a result of contact with the diseases that run rampant in jails & prisons could finally come to an end.”*

*~Inside Corrections Technology, June 2000*

*“I’ve been spit on, had feces and/or urine thrown on me several times during my career. It’s nice to know that with Bio-Safe, I’ve got that “extra” protection!”*

*~Tim Bennett, Life Safety Coordinator, Colorado Territorial Correctional Facility*

**Try Bio-Safe Hand Sanitizer for a quick clean-up when water is not available.**
