

## Product Information Sheet

### CP-0401

EVA Liquid

Application Temperature(s): N/A  
Color: White  
Freeze Thaw Stable: NO  
Min Use Temperature: 35°F

Shelf Life: 6+ Months  
Solids (~): 55%  
Specific Gravity (~): 1.08  
Viscosity: 95000

#### Characteristics:

Fast set speed. Low minimum use temperature. Excellent bonding characteristics to dissimilar substrates.

#### Applications:

A fast setting adhesive specially formulated for room temperature bonding of porous substrate to difficult-to-bond synthetic materials such as melamine surfaces and highly impregnated papers. Product also shows success in bonding wood to metals such as stainless steel, copper and aluminum.

#### Directions:

Use freshly machined stock free of dirt or oil  
Apply to one side of stock with brush, roller or roll spreader, 5-7 wet mil  
Assembly time is 5 to 15 minutes depending on temperature, moisture content, species and porosity  
Clamp 30 to 45 minutes  
Cure 24 hours before machining

#### Clean Up and Storage:

Cleans up easily with warm soapy water while wet. After cure, excess adhesive can be removed by scraping or sanding.

Cool temperatures- 55°F to 80°F. Avoid contact with iron.
