

## Product Information Sheet

### CP-2118

#### RELEASE AGENT

Application Temperature(s):	N/A
Color:	Light Cream
Freeze Thaw Stable:	N/A
Min Use Temperature:	N/A
Shelf Life:	@ 70F 12 months
Solids (~):	N/A
Specific Gravity (~):	~0.94
Viscosity:	3000-4000

#### Characteristics:

Type: Release Agent

Non-flammable, non-toxic fumes, easy clean-up. When used properly, it makes clean-up faster and easier.

#### Applications:

This is an oil and wax emulsion designed to protect metal from water and water-based adhesives, paint, and lacquer. It may be used on clamp carriers, conveyors, clamps, lay-up tables, and equipment used in woodworking, paper, and corrugated industries.

#### Directions:

Make sure all surfaces to be coated are clean and free from any foreign matter. Apply a thin coat onto the surface with a brush or sponge. Allow it to dry before exposure to glue. Sufficient dry time is apparent when the film turns clear. Do not use on hot platens.

#### Clean Up and Storage:

It may be removed by scraping with a reasonably sharp putty knife or similar scraping tool. A forceful stream of hot water along with soap will aid clean-up.

Keep from freezing and keep tightly sealed to maintain maximum quality.
